

SHIVA SHANKAR CHANDA

Full Stack Developer | Hyderabad, Telangana | +91 96183-94701 | shankarshiva74541@gmail.com | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience building scalable web and mobile applications using **Python, Django, Django REST Framework, FastAPI, React, React Native, HTML, CSS, JavaScript, and PostgreSQL/MySQL**. Delivered production systems with REST APIs, real-time WebSockets, secure JWT/RBAC auth, and cloud deployments on **AWS/Linux/NGINX**. Hands-on with **AI engineering: LLM integration, RAG pipelines, embeddings, semantic search, and vector databases**.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, HTML, CSS

Backend: Django, Django REST Framework, FastAPI, Flask, REST APIs, WebSockets, Celery, Redis, JWT, RBAC

Frontend / UX: React.js, Next.js, Redux, Material UI, Tailwind CSS, Responsive Design

Mobile: React Native, Expo, Flutter

AI / LLM / RAG: LLM Integration, RAG Pipelines, Embeddings, Semantic Search, Vector DBs, Prompt Engineering, OpenCV, TensorFlow, PyTorch

Databases / BaaS: PostgreSQL, MySQL, MongoDB, Redis, Firebase, Elasticsearch

DevOps: AWS, Azure, Docker, CI/CD, Linux, NGINX, Git, GitHub Actions

Additional: SOLID, Clean Architecture, Caching, Secure APIs, Agile/Scrum

Leadership: Team Lead (PROMS), Mentorship, Code Reviews, Delivery Coordination

PROFESSIONAL EXPERIENCE

Full Stack Developer | Avsys International India Pvt Ltd

Hyderabad, Telangana | August 2024 - Present

- Developed scalable backend applications and REST APIs using **Python, Django, Django REST Framework, and FastAPI** for enterprise web, simulation, monitoring, and internal business applications.
- Designed and implemented real-time application workflows using **Django Channels, WebSockets, Redis, and ASGI**, enabling live data updates and event-driven communication.
- Architected and developed database-driven modules using **PostgreSQL and MySQL**, handling data models, relationships, CRUD operations, business logic, and API integrations.
- Implemented secure authentication and authorization using **JWT**, role-based permissions, input validation, and access-control mechanisms across web and mobile applications.
- Contributed to and delivered backend functionality for a real-time simulation platform, including live data ingestion, tracking workflows, scan operations, reporting, and visualization-ready APIs.
- Developed responsive frontend modules using **React.js, JavaScript, HTML5, CSS3, Tailwind CSS**, and reusable components, integrating them with Django/DRF and FastAPI services.
- Developed and integrated **Flutter** mobile application features with backend REST APIs, authentication, user workflows, and application services.
- Worked across **AWS, Firebase, Linux, Git/GitHub, and CI/CD** pipelines for application deployment, environment configuration, version control, and release management.
- Built and integrated web application functionality using **Next.js and Node.js**, extending full-stack development capabilities across modern JavaScript technologies.
- Led and coordinated a **3-member development team** through planning, task distribution, code reviews, debugging, and delivery coordination while contributing hands-on to product development.
- Applied **OOP, SOLID principles**, modular architecture, caching, middleware, NGINX/reverse-proxy concepts, and secure deployment practices to maintain clean and production-ready applications.
- Currently expanding expertise in AI/ML application development, focusing on **LLMs, RAG, embeddings, semantic search**, and AI-assisted workflows as a personal technical learning direction.

Full Stack Developer Intern | Bharath Intern

Madhya Pradesh, India | January 2024 - May 2024

- Built a media streaming platform with **React**, search, and recommendations; improved wait time by **about 25% using caching**; deployed on **Azure**.

Full Stack Developer Intern | Interpe

New Delhi, India | July 2023 - August 2023

- Developed e-commerce with **Django REST APIs, MySQL**, and **AWS**; reduced manual promotion effort by **about 30%**.

PROJECT EXPERIENCE

DocuMind AI - LLM & RAG Knowledge Assistant

Python, FastAPI, LLM, RAG, Embeddings, Vector DB, React, Redis, Docker

- Built an AI knowledge assistant that answers questions from uploaded PDFs/docs using **LLM + RAG** - chunking, embeddings, vector retrieval, grounded generation with source citations.
- Designed **FastAPI** orchestration for prompt templates, context injection, and chat history; **React** UI for document upload and conversational Q&A.

Blood450 - AI-Powered Blood Donation & Emergency Donor Matching Platform

Django, Django REST Framework, Flutter, PostgreSQL/PostGIS, Redis, Django Channels, Celery, JWT, Google OAuth, AWS/Vercel

- Developed a full-stack blood donation platform with **Django/DRF** backend and **Flutter** mobile application, supporting donor registration, authentication, donor profiles, blood-group based search, availability and donation-history management.
- Implemented location-based donor discovery using geospatial data, enabling emergency requests to identify nearby eligible donors and progressively expand the search radius when required.
- Built secure REST APIs with **JWT** authentication, **Google OAuth** integration, OTP-based verification, and role-based access flows for users, donors and administrators.
- Integrated **Redis, Django Channels** and asynchronous processing to support real-time communication and emergency donor notification workflows.
- Designed donor eligibility logic based on last donation date and 90-day eligibility rules, with separate administrative views for eligible, ineligible and unavailable donors.
- Developed and integrated the **Flutter** Android application with the Django backend, ensuring consistency between mobile and web registration, authentication, donor onboarding and emergency workflows.

- Worked on production deployment and cloud integration, including **AWS/Vercel** environments, PostgreSQL/Supabase connectivity, environment configuration, API endpoints and release APK configuration.

FlightDeck - Aviation Platform for Indian Aviators

React, React Native (iOS/Android), Firebase (Auth/Firestore)

- Took full ownership of an existing live aviation platform across web and mobile (**React Native** for iOS and Android), working independently from requirements through release.
- Used **Firebase (Auth/Firestore)** as the shared backend for both web and mobile; delivered admin/content workflows and kept UX aligned across platforms.
- Investigated production issues and shipped fixes without rewriting the product; contributed practical architectural improvements while preserving existing systems.

EDUCATION

B.Tech, Computer Science and Engineering | TKR College of Engineering and Technology

Hyderabad, India | August 2020 - June 2024 | GPA: 8.30

CERTIFICATES

Data Structures and Algorithms in Python (Aug 2023) | Kimo Python Certificate (Apr 2023) | ReactJS National Workshop (Jul 2021)
